

Ansar Khan

Angular Developer

CONTACTS

Portfolio

- +91 9861062015
- anoansarkhan@gmail.com
- Korai, Jajpur, Odisha 755022

TECHNICAL SKILLS

- Angular
- Angular CLI
- Ionic
- JavaScript
- TypeScript
- HTML
- CSS / SCSS
- Angular Material
- PrimeNG
- DevExtreme
- RxJS
- XLSX
- Windows
- Visual Studio Code
- Font Awesome
- Jira
- Git, Gitea
- GitHub
- Tailwind CSS
- Bootstrap
- Postman
- Unit Testing
- Debugging

SOFT SKILLS

- Effective communication
- Problem solving ability
- Time management
- Team work
- Collaboration with cross functional teams
- Agile

PROFILE SUMMARY

Results-oriented Angular Developer with expertise in building responsive, dynamic and scalable web and mobile applications using Angular and Ionic framework. Known for excelling in writing maintainable, reusable, high-quality code, optimizing application performance and user experience within Agile environments. Adept at quickly adopting and implementing emerging and cutting-edge technologies. Specializing in developing user-centric applications that drive measurable results and business success. Passionate about continuous learning and seamless collaboration with a strong commitment to delivering impactful solutions that exceed expectations.

EXPERIENCE

AJA Consulting Services LLP

Dec 2025 – Present

Angular Developer – **Keypoint Technology**

Hyderabad, India

- Developing a large-scale government web application using Angular 21, implementing advanced features like bulk CSV and XLSX upload/download, dynamic dashboards and secure form workflows within a strict compliance framework.
- Developed a performant SPA using modular and reusable components, lazy loading, standalone APIs and Signals, integrated RESTful APIs, optimized state management with RxJS and ensured responsiveness in an Agile/Scrum environment.

Wings Infonet Private Limited

Feb 2023 – April 2025

Angular Developer

Hyderabad, India

- Developed ERP-based application on Finance, Sales, Inventory and Tax (GST/CGST/SGST/IGST) using Angular for dynamic SPAs and Ionic for cross-platform mobile apps, ensuring compliance and data integrity.
- Leveraged RESTful APIs and modular development within the SDLC to build scalable, high-performance applications, while conducting rigorous debugging, unit testing and bug-fixing to enhance stability.
- Collaborated with cross-functional teams to deliver seamless implementation, maintaining flexible, maintainable and well-integrated systems end-to-end.

Tata Consultancy Services (TCS)

Feb 2022 – Sept 2022

Angular Developer Trainee

Kolkata, India

- Developed dynamic UIs with Angular and complex Reactive Forms with custom validators.
- Implemented component communication using @Input/@Output and shared services and integrated RESTful APIs with HttpClient for CRUD operations.
- Dynamic data operations like filtering, sorting, and real-time UI interactions. Enhanced performance and maintainability through Angular Routing and Lazy Loading for a modular application structure.

ACHIEVEMENTS

National Qualifier Test (NQT)
TCS iON, Oct-2020

PERSONAL DETAILS

Name: Ansar Khan
Gender: Male
DOB: 15th Mar 1998
Marital Status: Unmarried
Nationality: Indian

PROJECTS

Sahaj Gail

Unified Customer Management System

- Developing role-based Unified Customer Management System for PNG/CNG customers & partners, covering onboarding, billing, CRM, DRM and admin modules using Angular 21.
- Implementing RESTful APIs with adaptors using HTTP Clients, lazy loading, RxJS, reusable component and Bootstrap for a modular, scalable and optimized frontend architecture.

Wings ERP

Product Sales and Purchases with Finance and Stock Management

- Developed ERP application to manage sales, purchases, inventory and finance, implementing full CRUD operations by integrating RESTful APIs with Angular HTTP client and RxJS.
- Built responsive, reusable UIs with Directives and Pipes, configured routing with lazy loading and managed state via @Input/@Output, Services and Reactive Forms.
- Enabling transaction, report and master data management with a focus on performance and code reusability.

ApnaaGhar

Real estate search buy sell and rent

[Code Link](#)

[Live Link](#)

- Designed and developed ApnaaGhar application, a real estate platform using Angular 18, enabling users to buy, rent or explore PG, commercial and project listings.
- Implemented location-based search, authentication (login, sign-up, logout) with reactive form validation, property filtering and detailed property views for enhanced user experience.
- Optimized performance using lazy-loading and built a responsive UI leveraging the PrimeNG library.
